UPDATED: SEP 2026

JUAN GUTIÉRREZ

Full Stack Developer

BSC IN COMPUTER ENGINEERING · UNIVERSITY OF ALICANTE

PROFILE

I design and build complete end-to-end systems: from the written spec to the domain model, the API contract, the backend, the frontend and the cloud deployment. I run my own product in production with a real client, and I have built systems under regulatory compliance, with traceability and tamper-proof audit trails.

I work spec-first, test-driven, with API contracts as the source of truth, versioned migrations and continuous deployment. I ship AI models in real product, local inference included, and I set up agent systems with control harnesses. My earlier background in Marketing and Advertising adds product and analytics judgement.

EXPERIENCE

Right on it — Full Stack Developer

MAR 2023 - DEC 2024

US · rightonitcorp.com

- Co-developed a real-time inventory control system for a corporate client, with a microservice architecture and a REST API.
- Predictive analysis and custom reporting in the management dashboard.

PROJECTS

MenuUnfolded

2026 - PRESENT

QR digital menu SaaS for restaurants · menuunfolded.com

- Digitises restaurant menus through QR codes: admin panel, scan analytics and a freemium subscription with a payment gateway.
- Multimodal AI menu importer that extracts dishes from photos or PDFs of the physical menu.

Next.js · TypeScript · FastAPI · PostgreSQL + Alembic · JWT · Stripe · SSE

IN PRODUCTION WITH A REAL CLIENT · ~100 DAILY VISITS

Loomcast

JUL 2026 - PRESENT

Multimedia studio with 100% local generative AI

- Generates video, image and music running the models entirely on-device, with no paid APIs: a pipeline from topic to final 9:16 vertical cut.
- Inference over quantized models on Apple Silicon, with memory orchestration and a job queue with chaining and recovery.

Layered FastAPI · Astro + Svelte · llama.cpp · ComfyUI ·
Whisper/MLX · ffmpeg

BENCHMARKING THAT CUT RENDERING FROM HOURS TO ~1.5 MIN PER VIDEO

NuxoAsist

JAN - JUN 2026

Working-time tracking and clock-in system

- Time registry aligned with Spanish labour regulation: clock-ins, breaks, overtime, absences, schedules with validity ranges and export for labour inspection.
- Fixing an entry never destroys the previous one: it is kept in an append-only audit trail with author, date and a mandatory reason.

Node 22 + Fastify 5 · React 19 + Tailwind · PostgreSQL 16 ·
OpenAPI 3.1 (36 endpoints) · node-cron

178 TESTS WITH VITEST

MindCheck

2025

AI test generator from PDF documents

- Educational platform that turns PDF documents into interactive multiple-choice tests with AI, with authentication, session control and a modular architecture.

Next.js · TypeScript · FastAPI · PostgreSQL · JWT

EDUCATION

BSc in Computer Engineering

4TH YEAR · GRADUATING 2027

University of Alicante

BSc in Marketing and Advertising

JUNE 2025

UNIR, Universidad Internacional de La Rioja

EXTRA

- Spanish (native) · English (B2, accredited by the U. of Alicante)
- Open to a curricular or extracurricular internship agreement with the UA
- Ten previous years in digital marketing, eCommerce and project management (Colombia and the US, 2006–2023)
- Immediate availability, geographic mobility and a category B driving licence
